

CRYPTO INTELLIGENCE PLATFORM

Your daily crypto market command center

We turn raw market noise into one clear daily decision — built for everyday investors, not just quants.

[Investor Overview](#)

THE PROBLEM

Most retail investors are flying blind

Too much noise

Dozens of dashboards, charts and conflicting opinions — and no clear answer to “what do I do today?”

Emotion-driven decisions

Without a framework, people buy near the top in euphoria and sell near the bottom in fear.

Pro tools are intimidating

Quant-grade risk models exist, but they are technical, scattered and priced for institutions.

The problem isn't a lack of data — it's making sense of it.

THE SOLUTION

One platform. One daily answer.

Pastatrade reads BTC risk, altcoin strength, on-chain conditions, social attention, cycle position and exit risk — then tells you, in plain language, what the market is telling you today.

Plain-language signals

Accumulate, hold, reduce, or scale out — no jargon required.

Probability-style scoring

Transparent 0–1 risk models, not hype or price predictions.

All-in-one command center

Every signal on one page, in one daily read.

From raw data to a confident decision

1

Aggregate

Live market, on-chain, social, cycle & price-history data — continuously synced.

2

Score

Normalized 0–1 risk models and ranking-based intelligence across every module.

3

Act

A clear regime: accumulate, hold, reduce DCA, take profit, or scale out — with the “why”.

Result: you act on the market regime, not the headlines.

Market Overview

Answers: *What is the market telling me today?*

- Plain-language “Daily Market Read” + market posture badge.
- Six signal cards: BTC risk, altcoin breadth, social, exit, ecosystems, liquidity.
- Strongest signal & biggest warning of the day, at a glance.

POSTURE

Accumulation-friendly

Market read

BTC Risk Model

Answers: *Is Bitcoin cheap, fair, or overheated right now?*

- A 0–1 risk score from drawdown, Mayer Multiple, MA extension & RSI.
- Six clear zones from “Aggressive DCA” to “Distribution”.
- Plain-language DCA guidance — act on the regime, not the noise.

BTC RISK

0.18 · Aggressive DCA

[BTC read](#)

Social Risk

Answers: *Is the crowd calm — or getting euphoric?*

- Blends Fear & Greed, Google Trends, Wikipedia & YouTube attention.
- Five zones from “Very quiet” to “Hype / euphoria risk”.
- Reweights automatically over whatever data sources are live.

SOCIAL

0.25 · Quiet

Social read

Altcoin vs BTC

Answers: *Which coins are truly beating Bitcoin?*

- Alt/BTC ratios, oscillators & breadth — not just USD price.
- Altcoin Season Index: is it BTC-led or broad risk-on?
- Premium multi-coin compare to separate real strength from USD bounces.

ALT SEASON

43 · Selective

[Altcoin read](#)

BTC Cycle Lab

Answers: *Where are we in the Bitcoin cycle?*

- Full BTC history since 2010, halvings and prior cycle lows mapped.
- Cycle-extension risk and ROI-from-event framing.
- Context for whether the cycle still has room to run.

CYCLE

Mid-cycle

[BTC read](#)

Ecosystem Rankings

Answers: *Where is capital rotating next?*

- TVL-driven strength scores across major chains & ecosystems.
- Spot whether rotation is quiet, selective, or broadening.
- “Why ranked here?” detail drawers for Premium.

ROTATION

Selective

Ecosystem read

Logarithmic Regression Bands

Answers: *Is BTC / ETH near long-term value or overheated?*

- Fits each asset's long-term growth curve with value & bubble bands.
- Deep value, fair value, elevated and bubble-risk zones.
- Beginner-friendly reads for both BTC and ETH.

Dynamic Exit Strategy

Answers: *When should I start scaling out as risk rises?*

- One Exit Risk Score from BTC, on-chain, social, breadth & cycle.
- A configurable exit ladder: stop DCA, take profit, then scale out.
- Conservative / Balanced / Aggressive profiles — never “sell now”.

EXIT SIGNAL

Hold · 31/100

Dynamic read

Portfolio Exit Simulator

Answers: *What does the risk mean for MY portfolio?*

- Enter your portfolio size; see a risk-based scale-out scenario.
- Profit-only, recover-capital and moonbag modes.
- A scenario table at every risk level — a simulation, not advice.

\$10K SIM

Scale-out 10–20%

Portfolio read

Reports & Watchlist

Answers: *How do I get the full picture without checking everything?*

- Daily / weekly / monthly reports auto-built from every module.
- English & Swahili — shareable to WhatsApp & Telegram.
- Personal watchlist with alerts and “why I’m watching” notes.

REPORTS

Reports read

Built for humans, not just quants

● Plain-language, not jargon

Every score becomes a clear action a beginner understands.

● Probability, not predictions

We describe conditions and risk — we never promise price.

● All-in-one

Risk, on-chain, social, cycle, exit & reports in one place.

● Localized & shareable

English + Swahili, WhatsApp/Telegram-ready — rare in this space.

● Transparent models

Open methodology; no black-box “trust me” signals.

● Operator-ready

Admin controls plans, features & local payments out of the box.

Freemium subscriptions, built-in upsell

FREE

The hook

- Market overview & metrics
- Core BTC risk score
- Report previews

MID

The upgrade

- Signal intelligence
- Social & advanced filters
- Bigger watchlist & alerts

PREMIUM

Full power

- Every module unlocked
- Exit strategy & simulator
- Full reports & exports

Operator-friendly: admins assign plans, toggle any feature per tier, and accept manual / local payments (e.g. M-Pesa) with built-in upgrade follow-ups.

Global product, local advantage

Swahili-first, built for East Africa

Sub-Saharan Africa is among the fastest-growing crypto-adoption regions in the world. Most intelligence tools are English-only and Western-priced. Pastatrade ships in English + Swahili, shares to WhatsApp/Telegram, and accepts local payments — meeting users where they already are.

NEXT

In build

- Total market-cap regression
- Sector rankings
- Automated payments

LATER

Vision

- Mobile app
- More on-chain sources
- AI report summaries

Act on the regime, not the headlines

Focus on the REGIME

The bigger market structure & conditions

- Bull market vs bear market
- Risk-on vs risk-off
- Liquidity expanding or tightening
- BTC dominance rising or falling
- Altcoins bleeding or outperforming

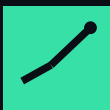

Ignore the HEADLINE noise

Short-term news that distracts

- War & geopolitics
- ETF rumors
- Elections
- Rate decisions
- Hype narratives

“Smart investors don’t react to every headline — they act according to the market regime.”

Example: scary headlines + improving liquidity, trend & cycle = opportunity, not panic.

Act on the regime, not the headlines.

Pastatrade turns the whole crypto market into one confident daily decision — and makes premium intelligence feel effortless for everyday investors.
